Course Description

This course is designed to provide you with hands-on practical experience developing software and/or delivering IT solutions in a project environment. You will work in teams and complete projects from inception to implementation. The emphasis is on understanding and working within a corporate environment, using formal project and software delivery methodologies and integrating all the skills and knowledge that you have acquired into a solid base from which to progress your professional life.

This course includes a work integrated learning (WIL) experience in which your knowledge and skills will be applied and assessed in a real or simulated workplace context and where feedback from industry and/or community is integral to your experience
